

Name:

Are we keeping ourselves safe?

- This assessment task is for use in **L2PED**.
- The Learning Leader(s) who will use this assessment task is/are **BN, TE**.
- This assessment is aligned to the NZC area **Health and Physical Education**.
- You must submit your work for this assessment by **Friday 25th September**.
- This submission date is a **deadline**.
- **Your work for this assessment is covered by your signed DECLARATION OF AUTHENTICITY**

NCEA Standard Information	
This assessment task assesses standard number 91333v2 .	
The full title of the standard is Analyse the application of risk management strategies to a challenging outdoor activity	
This standard has a credit value of 3 cr and is a Level 2 Achievement standard .	
The grades available for this standard are N, A, M and E .	
L1 Literacy: No	Numeracy (all levels): No
University Entrance Literacy: No	Contribution to UE Lit: None
UE approved: No	UE subject(s)
Vocational Pathways Contributions	
Construction and Infrastructure: No	Manufacturing and Technology: No
Primary Industries: Sector related	Service Industries: Sector related
Social and Community Services: No	Creative Industries: No

Final Grade	Comments	
Not Achieved (N)		
Achieved (A)		
Merit (M)		
Excellence (E)		
Marker Initials:		
Date:		

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
Analyse the application of risk management strategies to a challenging outdoor activity.	Analyse, in-depth, the application of risk management strategies to a challenging outdoor activity.	Analyse comprehensively the application of risk management strategies to a challenging outdoor activity.

Learner Instructions

Alfriston College wishes to improve its risk management systems for school trips. It is seeking your input into improving these systems.

For this assessment you are required to analyse the application of selected risk management strategies for whitewater rafting and high ropes courses.

Risk management strategies are developed that contribute to the application of planning tools such as:

- risk analysis management system (RAMS)
- safety action plans (SAPs) and safe operating procedures (SOPs)
- ensuring physically, emotionally, and culturally safe environments, and care of the environment.

You will be assessed on the depth and comprehensiveness of your analysis and on how fully and clearly you support it with examples.

As part of this activity, though not directly assessed, you are required to:

- complete a pre-trip risk management analysis
- participate in the trip and demonstrate safe behaviour

These activities are to be completed before you start writing your report. The risk management analysis and the safety behaviour log, are to be submitted to your teacher for validation. These preparatory activities will provide the basis and supporting evidence for your analysis and evaluation.

Task 1a -Pre - Activity Site Assessment

Answer the following questions below in as much detail as possible. This must be completed before attending and taking part in the event.

High Ropes ([Wero Climb](#))

1. Where are you going? (including full address if applicable)

2. What is the total distance you will travel for this trip?

3. What are the cultural and historical features of the site?

4. Are there any features unique to the site (if yes, explain)?

5. Are there any hazards that require specific management strategies? Identify them.

6. What activities will you be doing on this trip?

7. Is the site appropriate for this activity (**high ropes**) and explain why/ why not?

8. Is there suitable access to the site for vehicles in case of emergency?

9. Is there a supply of fresh water on site? If not, what will you do for water?

10. Is communication available at the site in case of an emergency? If so, in what form?

11. Who will be attending this trip? How many Learning Leaders?

12. Who attending this trip is first aid trained?

13. Is there any other relevant safety information?

14. Where are you going? (including full address if applicable)
15. What is the total distance you will travel for this trip?
16. What are the cultural and historical features of the site?
17. Are there any features unique to the site (if yes, explain)?
18. Are there any hazards that require specific management strategies? Identify them.
19. What activities will you be doing on this trip?
20. Is the site appropriate for this activity (Whitewater Rafting) and explain why/ why not?
21. Is there suitable access to the site for vehicles in case of emergency?
22. Is there a supply of fresh water on site? If not, what will you do for water?
23. Is communication available at the site in case of an emergency? If so, in what form?
24. Who will be attending this trip? How many Learning Leaders?
25. Who attending this trip is first aid trained?
26. Is there any other relevant safety information?

Task 1b: Risk Analysis and Management

Complete the table below to demonstrate an understanding of risk identification and possible management strategies when participating in the activity.

Activity 1: High Ropes Course		Location: Wero Climb	
What could go wrong? • Death • Major Injury (spinal, head, life threatening injuries) • Minor Injury (Broken bones, sprains, strains, etc) • Medical Emergency • Missing person • Emotional trauma / psychological harm • Illness	What could cause this to go wrong? People:	How could we manage / minimise this risk? •	Whose responsibility is this?

	Equipment:		
	Environment:		

Activity 2: Whitewater Rafting		Location: Wero	
What could go wrong? ● Death ● Major Injury (spinal, head, life threatening injuries) ● Minor Injury (Broken bones, sprains, strains, etc) ● Medical Emergency ● Missing person ● Emotional trauma / psychological harm ● Illness	What could cause this to go wrong? People: ●	How could we manage / minimise this risk? ●	Whose responsibility is this? ●

	Equipment:		
	Environment:		

Task 2: Reflection Logs

Complete the following 2 logs reflecting on how you demonstrated safe behaviours during the outdoor activities and the effect that this had on yourself and others.

Activity: Wero Climb - High ropes course	Date:
Risk management strategy # 1:	Risk management strategy # 2:
<i>Explain in detail using examples WHAT you did and WHY in regards to risk management strategy #1:</i>	<i>Explain in detail using examples WHAT you did and WHY in regards to risk management strategy #2:</i>
<i>Explain in detail what EFFECT this had on keeping YOURSELF safe throughout this activity?</i>	<i>Explain in detail what EFFECT this had on keeping YOURSELF safe throughout this activity?</i>

<i>Explain in detail what EFFECT this had on keeping OTHERS safe throughout this activity?</i>	<i>Explain in detail what EFFECT this had on keeping OTHERS safe throughout this activity?</i>
<i>If I did this activity again what changes would I make to the way I managed risk?</i>	

Activity: Wero - Whitewater Rafting	Date:
Risk management strategy # 1:	Risk management strategy # 2:
<i>Explain in detail using examples WHAT you did and WHY in regards to risk management strategy #1:</i>	<i>Explain in detail using examples WHAT you did and WHY in regards to risk management strategy #2:</i>

<i>Explain in detail what EFFECT this had on keeping YOURSELF safe throughout this activity?</i>	<i>Explain in detail what EFFECT this had on keeping OTHERS safe throughout this activity?</i>
<i>Explain in detail what EFFECT this had on keeping OTHERS safe throughout this activity?</i>	<i>Explain in detail what EFFECT this had on keeping OTHERS safe throughout this activity?</i>

If I did this activity again what changes would I make to the way I managed risk?

Task 3: Report

In the space provided below write a report in which you analyse the application of **TWO** risk management strategies used during this trip.

In your report, you should:

- Identify the risk management strategies you consider most appropriate and explain how these strategies were applied.
- Explain HOW and WHY each of these particular strategies were applied and were relevant to the risks identified.
- Evaluate the application of your risk management strategies to your experience.
- What were the positive and negative effects of the application of the chosen strategies?
- Could you modify the chosen strategies to minimise any negative effects.

When explaining and evaluating the application of your risk management strategies consider their impact on your physical, emotional, and cultural safety. Support your analysis with examples from your own and others' experiences (refer to your risk management analysis and safety behaviour log)

It is the quality of your analysis, not the length of your report that will be assessed.

----- **WRITE YOUR REPORT HERE**-----

- Identify the risk management strategies (TWO) you consider most appropriate and explain **HOW** and **WHY** each of the two strategies were applied and were relevant to minimise the risks identified, use specific examples from the experience.

- Explain in depth **HOW** these strategies were applied and the impact it had on self and others, use specific examples from the experience.
- Explain in depth **WHY** these strategies were applied and the impact it had on self and others, use specific examples from the experience.

- Evaluate the application of your risk management strategies to your experience.
- What were the positive AND negative effects of the application of the chosen strategies?

- How could you modify the chosen strategies to minimise any negative effects in a future experience?

(3 Credits)

	A	M	E
• The Learner has applied risk management strategies during an outdoor activity. • They have considered people, equipment and environmental factors when analysing risk. • In their report, the Learner gives reasons for how and why they selected and applied risk management strategies to the outdoor experience and supports these reasons with examples.			
• The Learner has applied risk management strategies during an outdoor activity. • They have considered people, equipment and environmental factors when analysing risk. • In their report, the Learner gives reasons for how and why they selected and applied risk management strategies that are relevant to the risk analysed. The report is written in-depth explaining the effect of their risk management strategies on self and others. This is supported by examples.			
• The Learner has applied risk management strategies during an outdoor activity. • They have considered people, equipment and environmental factors when analysing risk. • In their report, the Learner evaluates how and why they selected and applied risk management strategies that are relevant to the risk analysed. The report clearly evaluates the effect of their risk management strategies on self and others. This is supported by examples. The student has considered future changes, Pros and Cons of their selected strategies.			

Final grades will be decided using professional judgement based on a holistic examination of the evidence provided against the criteria in the Achievement Standard.
