

Name _____

New Zealand Health Practices

- This assessment task is for use in **L3HEA**
- The Learning Leader(s) who will use this assessment task is/are .
- This assessment is aligned to the NZC area **Health and Physical Education**.
- You must submit your work for this assessment by
- This submission date is a **recommended submission date**.
- ***Your work for this assessment is covered by your signed DECLARATION OF AUTHENTICITY***

NCEA Standard Information	
This assessment task assesses standard number 91463v2 .	
The full title of the standard is Evaluate Health practices currently used in New Zealand	
This standard has a credit value of 5 cr and is a Level 3 Achievement standard .	
The grades available for this standard are N, A, M and E .	
L1 Literacy: Yes	Numeracy (all levels): No
University Entrance Literacy: No	Contribution to UE Lit: None
UE approved: Yes	UE subject(s) Health Education
Vocational Pathways Contributions	
Construction and Infrastructure: No	Manufacturing and Technology: No
Primary Industries: No	Service Industries: No
Social and Community Services: Sector related	Creative Industries: No

Final Grade		Comments
Not Achieved (N)	☐	
Achieved (A)	☐	
Merit (M)	☐	
Excellence (E)	☐	
Marker Initials:		
Date:		

Achievement	Achievement with Merit	Achievement with Excellence
<u>Evaluate</u> health practices currently used in New Zealand.	Evaluate, <u>in-depth</u> , health practices currently used in New Zealand.	Evaluate, <u>perceptively</u> , health practices currently used in New Zealand.

Student instructions

Introduction

This assessment activity requires you to write a report that evaluates three health practices currently used in New Zealand to treat or prevent a health circumstance.

You will complete your research over a period of approximately 4 weeks of in- and out-of-class time, and you will have 4 hours to write your individual final report.

This is an open-book (resource-based) assessment – you are allowed access to the resources that you have gathered in your research as you write your report. Your resources and/links to resources should be in the folder with the link below.

You will need to support your evaluation with evidence from the readings and/or class notes. Supporting evidence (someone else's ideas, quotations) must be referenced as per the instructions provided by your teacher.

You will be assessed on how perceptively your report evaluates the three health practices used to treat or prevent your health circumstance by:

Task 1 - Research

Select a health circumstance and source information about it.

Once you have selected a health circumstance, choose three health practices that are currently used to treat or prevent this health circumstance in New Zealand.

- One should be a Western scientific medicine (WSM)
- one should be a Complementary and Alternative medicine (CAM)
- one should be Traditional medicine (TM).

You will need to use a variety of resources (print, electronic and/or interviews) in your research, including general information resources about those health practices and resources specific to your chosen health circumstance.

See Resource A for a list of websites that may be of use.

You can consult with your teacher and work with other students during the researching phase to share information, **but you must write your report individually**. You will use the information from your research to write your report, but the research process itself will not be assessed.

Task 2 -Write your report

Write an individual report that evaluates your three chosen health practices. In your evaluation:

- explain the philosophy or knowledge foundation that underpins each health practice in relation to WSM, CAM and/or TM and in regard to the treatment or prevention of the health circumstance
- provide a comprehensive account of the procedures involved in treating or preventing the identified health circumstance with this health practice. The financial costs of, availability of, or access to, the health practice.
- discuss the advantages and disadvantages of each health practice in treating or preventing the health circumstance and draw justified conclusions as to which health practice(s) are likely to be more effective. You should cover the following aspects: the effectiveness of the health practice specifically in treating or preventing the chosen health circumstance.
- the impact of the health practice on the well-being of individuals (including short-term and long-term side effects), including their relationships with others and the impacts for society as a whole
- societal attitudes towards the health practice, its acceptability, people's rights to choose the health practice, and any challenges or controversy surrounding the health practice

Within your evaluation you should make connections between a selection of underlying concepts:

- hauora, socio-ecological perspective, health promotion and attitudes and values. The underlying philosophies, and the advantages and disadvantages of the health practices in regard to their use to treat/prevent the identified health circumstance.

Make sure you refer to and support all of your explanations with evidence from relevant resources.

Resource A: Possible information sources

- Cochrane Library: a collection of regularly updated evidence-based health care databases that can help clinicians and consumers make decisions about appropriate and effective health care, provided by the Ministry of Health
<http://www.thecochranelibrary.com>
- EPIC: a venture that provides schools with free access to a worldwide collection of databases. School librarians will be able to provide school log-in details
www.tki.org.nz/epic
- Rongoā: medicinal use of plants, details from Te Ara: The Encyclopedia of New Zealand <http://www.teara.govt.nz/en/rongoa-medicinal-use-of-plants>
- Traditional Chinese medicine, details from Wikipedia
http://en.wikipedia.org/wiki/Traditional_Chinese_medicine
- New Zealand School of Acupuncture and Traditional Chinese Medicine
<http://www.acupuncture.ac.nz>
- Alternative medicine, details from Wikipedia
http://en.wikipedia.org/wiki/Complementary_and_Alternative_Medicine
- Medicine, details from Wikipedia <http://en.wikipedia.org/wiki/Medicine>
- Urge/Whakamanawa, a youth health and information service designed to help young people find useful information relating to a range of youth-related topics
<http://www.urge.co.nz>

Within your evaluation you should make connections between a selection of underlying concepts:

Hauora, socio-ecological perspective, health promotion and attitudes and values. The underlying philosophies, and the advantages and disadvantages of the health practices in regard to their use to treat/prevent the identified health circumstance.

Make sure you refer to and support all of your explanations with evidence from relevant resources.

Health practice	Example
1. Western/scientised medical health practices	drug treatment, surgery, lifestyle change etc – all based on scientific understandings of the way the body works
2. Complementary/alternative medicine (CAM)	homoeopathy, naturopathy etc – based on old and new understandings of well-being that have a more holistic focus

3. Traditional medicine (TM).	Maori, Pasifika, Chinese, Indian or other cultural group who have identified traditional medicines
-------------------------------	--

The health circumstance may be existing, or one which could be prevented. Health circumstances include:

- a mental illness e.g. major or chronic depression
- an addiction e.g. smoking
- a physical illness or disease e.g. cancer, diabetes
- pain management e.g. back pain, arthritis, migraines
- reproductive health e.g. birth, (in)fertility.

Task 1 - Identify the Health Condition / Circumstance and 3 health practices selected for this assessment.

Health Condition / Circumstance:_____

Health practice 1. (Western/scientised) _____

Health practice 2 (Alternative/complementary)_____

Health practice 3 (Traditional) _____

Task Two: Link to your Resource Folder - put the link to your resource folder here. Make sure anyone with the link can access it.

Resource Folder:	
------------------	--

Task Three:

- Explain the philosophy or knowledge foundation that underpins each health practice in relation to WSM, CAM and/or TM and in regard to the treatment or prevention of the health circumstance (You can use the selected health practice for example/reference if you wish to)
- Explain the procedures used in your three selected health practices to treat or prevent your chosen health circumstance(WSM / CAM /TM).

Health Practise 1:

Philosophy:

Procedures involved / How the treatment works:

Health Practise 2:

Philosophy:

Procedures involved / How the treatment works:

Health Practise 3:

Philosophy:

Procedures involved / How the treatment works:

Task Four:

- Explain the financial costs of, availability of, or access to, the health practice
- Discuss the advantages and disadvantages of each health practice in treating or preventing the health circumstance and draw justified conclusions as to which health practice(s) are likely to be more effective. You should cover the following aspects: the effectiveness of the health practice specifically in treating or preventing the chosen health circumstance
- The impact of the health practice on the well-being of individuals (including short-term and long-term side effects), including their relationships with others and the impacts for society as a whole

Health Practise 1:

Health Practise 2:

Health Practise 3:

Task Five

Explain the societal attitudes towards each of the health practices, its acceptability, people's rights to choose the health practice, and any challenges or controversy surrounding the health practice

Health Practise 1:

Health Practise 2:

Health Practise 3:

Task Six

Conclusion - Draw justified conclusions about the health practices you chose and the impact of them on hauora, socio-ecological perspective, health promotion, and attitudes and values.

Evidence/Judgements for Achievement	Evidence/Judgements for Achievement with Merit	Evidence/Judgements for Achievement with Excellence
The student writes a report that evaluates three different health practices currently used in New Zealand. In their report, for each health practice, the student: - explains the philosophy that underpins the practice being used to treat/prevent the health circumstance in relation to WSM, CAM and/or T.M - explains the procedures involved in treating /preventing the identified health circumstance. Costs and access. - discusses the advantages and disadvantages of the practice when used to treat/prevent the health circumstance. Impact on wellbeing. - discusses attitudes towards health practice. - shows some evidence from credible sources to support the evaluation of health practices used to treat/prevent the health circumstance.	The student writes a report that evaluates, in depth, three different health practices currently used in New Zealand. In their report, for each health practice, the student: - compares the advantages and disadvantages of the health practice when used to treat/prevent the health circumstance - draws conclusions supported by reasoned arguments. - Uses evidence from credible sources to support the evaluation of health practices used to treat/prevent the health circumstance. - Student provides an outline of the health issue - Procedures: a range are covered compare advantages and disadvantages draw relevant conclusions that are supported - Few links to underlying	The student writes a report that evaluates, perceptively, three different health practices currently used in New Zealand. In their report, for each health practice, the student: - Makes connections between the relevant selection of the underlying concepts (that is, hauora, socio-ecological perspective, health promotion, and attitudes and values), - The underlying philosophies, and the advantages and disadvantages of the health practices in regard to their use to treat/prevent the health circumstance. - Draws justified conclusions. - Uses evidence from credible sources to support the evaluation of health practices used to treat/prevent the health

• Student provides a very basic outline of the health issue • Procedures explained, philosophies of each discussed • Adv and disadv explained in relation to hauora • Some underlying concepts considered • Overall comparison completed brief, • Critical perspective, evidence based consideration • Evidence is occasionally referenced	concepts • Evidence is referenced and reasonably current.	circumstance. The health issue is well explained • Procedures: asked, manipulations required, costs, key aspects of the practice • Fully developed explanations • Clear links to health concepts • Advantages / disadvantages a number of these, concise and coherent links concepts • States their conclusions as to what form of treatment is recommended with reference to their stated facts. • Evidence is referenced and current.
