Hauora Reflection Log Book

92018: Demonstrate understanding of the influence of personal movement experiences on hauora

Understanding Hauora

A holistic Māori perspective of health and well-being, encompassing multidimensional aspects that influence how we live, learn, and move.

What is Hauora?

Hauora is a philosophical concept of well-being unique to New Zealand. It goes far beyond physical fitness, representing the complete balance of an individual's life forces.

It teaches us that health is a dynamic state, constantly influenced by our actions, environments, and relationships.

Why It Matters

Interconnected Growth:
When you move, you don't just train your body. You interact with others, reflect on challenges, and strengthen your spirit.

Holistic Health:
Understanding Hauora helps us recognize how a change in one dimension directly impacts all other areas of our life.

The Fonofale Health Model

A Pacific island perspective of holistic well-being, represented as a traditional meeting house (fale) where all components are interconnected.

Roof: Culture

The shelter of the fale. Represents **cultural values, beliefs, and traditions** that shelter and bind us together. Can be traditional or modern.

Foundation: Family

The base of the fale. Represents **nuclear, extended, and community ties** that ground our lives and form our support systems.

The Four Pillars (Pou)

The columns holding up the roof. These are: **Spiritual** (faith/connection), **Physical** (body), **Mental** (thoughts/emotions), and **Other** (age/gender/status).

The Cocoon: Environment

The wrapping circle of **Environment, Time, and Context**. Represents how physical surroundings and timing shape who we are.

Level 1 Integration: Understanding Connections

Like a real fale, if any part is weak, the entire house becomes unstable. Your PE experiences directly influence these pillars—when you move and play, you strengthen your physical body, interact with your family (peers), find mental focus, and connect with your culture.

<https://www.youtube.com/watch?v=qErmdWY6u6A>

Roof: Culture (Aganu'u)

The protective shelter of the fale, representing cultural values, beliefs, and traditions that bind us together. It is dynamic and can adapt to both traditional and modern pathways.

What is Culture?

Culture provides the **shelter and safety** of the fale. It encompasses the language, customs, social structures, and shared identity that shape how Pacific people view the world, interact with others, and define well-being.

Why It Matters

As the roof, culture is the first line of defense. A strong cultural identity builds **belonging and pride**. In physical activity, this is realized by honoring heritage, practicing respect (Vā), and acknowledging shared family values.

Movement Example: Golf & Cultural Values

Applying core cultural values like respect, humility, and family expectations during a sports match directly integrates the culture element of Hauora.

"Playing golf with people older than me required me to practice traditional respect (Vā), maintaining silence during their swings and demonstrating humility. This connected me deeply to my family values and cultural expectations on the green."

Spiritual Pou (Fa'aleagaga)

The essential pillar representing inner strength, values, beliefs, and connection to ancestors, history, and the land that binds the fale structure.

What is Fa'aleagaga?

This dimension represents the **spiritual essence** of well-being. It is not limited to organized religion, but encompasses traditional beliefs, values, a sense of purpose, and connection to nature.

Why It Matters

A strong spiritual column provides **resilience and identity**. In movement, it is expressed through mindfulness, deep personal reflection, respect for the game, and unity with your team.

Movement Example: Golf & Mindfulness

During golf, focusing on breathing and finding mental quietness on the green directly strengthens the Spiritual pou. *"Taking a slow, deep breath before my swing helped me clear my mind of frustration and feel grounded and connected to the quiet environment."*

Physical Pou (Fa'aletino)

The bodily pillar of the fale, representing biological, anatomical, and physical well-being. It encompasses how we nourish, treat, and move our bodies to maintain vital energy.

What is Fa'aletino?

This dimension represents our **physical self**, focusing on organic health, nutrition, sleep, and physical fitness. It is the visible vehicle through which we experience movement, interact with the environment, and perform daily tasks.

Why It Matters

A sturdy physical pillar ensures the structural integrity of your overall health. In movement, active participation builds **strength and stamina**, releases tension, and coordinates motor skills to keep the fale foundation well-supported.

Movement Example: Golf & Motor Skills

During golf, walking the course and perfecting swing mechanics directly builds cardiovascular endurance and coordination. *"Carrying my clubs over 9 holes tested my physical stamina, while practicing my grip and swing posture repeatedly helped train my muscle memory for precise control."*

Mental Pou (Mafaufau)

The cognitive and emotional pillar of the fale, representing thoughts, feelings, and mental processes. It encompasses how we think, feel, and express emotions to maintain inner harmony.

What is Mafaufau?

This dimension represents our **mental well-being**, focusing on thoughts, feelings, behaviors, and emotional expression. It involves how we process stress, make decisions, and think about our experiences.

Why It Matters

A healthy mental column creates **clarity and focus**. In physical activity, it is demonstrated through strategic thinking, regulating emotions after setbacks, and developing mental toughness to overcome challenges.

Movement Example: Golf & Emotional Control

During golf, managing frustration after a poor shot directly builds emotional resilience. *"Missing an easy putt was frustrating, but taking a moment to accept it and plan my next shot logically kept me calm and focused on my strategy instead of quitting."*

Other Pou (Isimea)

The dynamic variables pillar of the fale, representing factors such as age, gender, sexual orientation, and social class. It encompasses how these personal and structural dimensions shape our movement opportunities.

What is Isimea?

This dimension represents the **diverse personal variables** that define our social reality. It includes age, gender, socioeconomic status, and life stage, which heavily influence how we access, experience, and value physical activity.

Why It Matters

Understanding Isimea highlights issues of **equity and access**. Recognizing how gender roles, age limits, or financial costs impact sport participation allows us to design more inclusive environments that support everyone's hauora.

Movement Example: Golf & Inclusivity

Analyzing who gets to play golf helps us understand the impact of age and socioeconomic status. *"While playing at the local course, I noticed most players were retired men, which made me realize how expensive gear and club memberships act as barriers for youth. Creating student-discount days directly helps make movement more accessible to my peer group."*

Family Foundation (Aiga)

The foundation of the fale structure, representing family (nuclear, extended, and community ties). It anchors the entire system of hauora, providing the grounding strength that supports all vertical columns.

What is Aiga?

This dimension represents the **crucial foundation** of family. In Pacific contexts, family extends far beyond households to include grandparents, cousins, and the whole community. It is the base on which all other pillars rest.

Why It Matters

Without a strong foundation, the entire fale becomes unstable. A supportive family network builds a sense of **belonging and security**, helping youth overcome barriers and fostering motivation to participate in physical activity.

Movement Example: Family Golf Outing

Participating in physical activities with relatives reinforces connection and strengthens the Aiga foundation. *"Going to the driving range with my uncle and cousins made me feel deeply supported. Playing together allowed us to share stories, laugh, and connect through sport, which grounded my wellness for the entire week."*

Hauora Reflection Log

This logbook supports Achievement Standard 92018. It documents how your personal golf experiences influence your personal well-being (hauora), using the Fonofale model as your analytical framework.

1. Log Three Experiences

You must participate in ongoing golf sessions and write a reflection for each.

For each entry, describe the physical setting, activities, and the key people involved. Each of your three entries must focus on a **different dominant dimension** of Fonofale.

2. Provide Rich Evidence

Do not write general statements. You must explain how your well-being was impacted with **detailed, specific examples**. Include exact dates, movement types, personal feelings, quotes, and names of peers or family members.

3. Synthesize & Connect

In your final reflection, explain how all **four dimensions of Fonofale** are interconnected and influence one another. Reflect on how movement overall impacts your health, and how this will shape your future physical activity choices.

"This logbook is not the final test, but you are permitted to bring this completed booklet with you into the external assessment room to support your work."

Completing Experience 1

Step-by-step instructions for documenting your first golf experience. Ground your reflection in the physical, spiritual, mental, or social dimensions of the Fonofale model.

1. Describe the Setup

Begin by describing the **physical setting** of your golf session. Record the exact date, the activities you performed, and the key people (uncle, cousins, or peers) who participated with you.

2. Map the Pillars

Explain how this session influenced **all 4 dimensions**: Physical, Spiritual, Mental, and Other. Provide detailed evidence including names, direct quotes, and specific movement types.

3. Identify the Dominant Dimension

Select the **one dimension** that was most heavily impacted by this experience. *"You must write an in-depth justification explaining WHY this pillar was influenced the most, supported by vivid, real-world examples from your time in the lesson."*

Exemplar: Experience 1

An student exemplar showing the expected standard of detail. This entry focuses on the Spiritual (Fa'aleagaga) dimension as the dominant influence during a team-based session.

1. The Setup & Details

Date: 12 August 2026

Setting: Whitford driving range

Activity: 50-ball driving challenge

People: Sione & Tane (peers)

Focusing on personal progression and collective connection rather than raw competition.

2. Mapping the Pillars

Physical: Repetitive swing technique tired my core.

Mental: Frustrated by early slices, required focus.

Other: Age dynamics (shared space with youth).

Spiritual: Sense of connection, alignment, and calm.

3. Dominant Dimension: Spiritual (Fa'aleagaga)

The session deeply reconnected me with my values and built mutual respect.

"Slowing down my breathing and synchronizing my stance with Peter and Shorif created a shared flow. When Righteous said 'nice shot, brother,' it wasn't just about the golf; it made me feel proud of persevering with something I struggled with."

Experience Reflection Starters

Struggling to start your writing? Use these sentence starters for each of the four Fonofale dimensions to build rich, descriptive evidence in your Hauora Reflection Log.

Physical & Spiritual Pillars

Physical (Fa'aletino):

"My body felt... because..."

"During the golf swing, I noticed..."

Spiritual (Fa'aleagaga):

"I felt a sense of calm when..."

"This session connected to my values of..."

Mental & Other Pillars

Mental (Mafaufau):

"When I sliced the ball, I reacted by..."

"Focusing on the technique helped me..."

Other (Age, Gender, Va):

"Sharing the lesson with Ishrat Created..."

"The positive dynamic affected my..."

Dominant Dimension Justification Starters

For the most crucial part of your reflection, use these prompts to justify your dominant pillar choice:

"The dimension most heavily impacted today was ____ because of Melody's encouraging words..."

"I chose this dominant pillar because my overall state of hauora shifted the moment we..."

"This experience showed me that my ____ well-being was key, as evidenced by..."

Hauora & Fonofale: Quick Quiz

Test your understanding of the Fonofale model, its core pillars (Pou), foundation (Aiga), and how they apply to your physical education assessment and golf reflection log.

QUESTION 01

What represents the foundation of the Fonofale structure?

QUESTION 02

What dynamic variables are represented by Isimea (Other Pou)?

QUESTION 03

How many distinct experiences must you log in your Hauora booklet?

QUESTION 04

Which achievement standard is supported by this reflection log?

QUESTION 05

Are you allowed to bring your completed logbook to the external exam?

QUESTION 06

What does 'Aiga' represent in Pacific contexts?

QUESTION 07

Why does understanding Isimea highlight issues of equity and access?

QUESTION 08

What are the three steps required for Experience 1?

QUESTION 09

What must you select and justify in depth for each log entry?

QUESTION 10

What is the main goal of the final synthesis reflection?

a) A reflection for each of your THREE separate personal movement experiences of your chosen physical discipline or sport. Each reflection should focus on a different aspect of Fonofale. • Identify your personal movement experience and the date on which you completed this (for example, mountain biking on 3 March, 2026). • How did the personal movement experience make you feel and influence your hauora? • Identify which elements in the Fonofale model of health this connected to (for example, the physical pou, Tino faaletino, which relates to your body, health, and physical needs). • Give a specific example of your own participation in the movement experience to show how and why this element was influenced. The influence could be positive or negative. Note: Do not repeat material in your three reflections.

b) Complete one final reflection where you draw overall conclusions, making connections to at least FOUR elements of Fonofale. • What have you learnt about how movement influences your hauora? • How might this impact your future movement experiences?

1. Connections between Fonofale elements:

In the Fonofale model, no single dimension operates in isolation; when my family foundation (friends) provided encouragement during practice, it directly lifted my mental resilience after frustrating mis-hits.¹ This emotional stability allowed me to stay relaxed, improving my physical posture and swing mechanics across gym, field, and driving range settings.² In turn, being outdoors on the school field and at Whitford Driving Range surrounded by supportive peers and family deepened my spiritual sense of peace and belonging.³ This proves that strengthening the family foundation stabilizes all four pillars, showing that physical movement is a great creator of holistic wellbeing.⁴

2. Overall reflection on golf experience across all four elements:

Reflecting on our Year 11 golf module, participating in indoor gym sessions, full-swing practice on the school field, and our trip to Whitford Driving Range influenced every dimension of my Fonofale health.¹ Physically (fa'aletino), repetition of hitting in the gym, on the field, and full drives at Whitford improved my core rotational balance and hand-eye coordination.² Mentally (mafaufau) and spiritually (fa'aleagaga), hitting targets at Whitford Driving Range alongside classmates on August 24th provided focus and stress relief, while our family foundation was strengthened through mutual encouragement during every session.³ Ultimately, progressing from the gym to the open range taught me that movement experiences are most powerful when they nourish mental and relational health alongside physical fitness.⁴

3. Learnings about how movement influences hauora:

Through this golf unit across the school gym, school field, and Whitford Driving Range, I learned that physical movement acts as a vehicle for holistic hauora rather than just a tool for physical exertion.¹ When I noticed my mood and group connection improve during low-intensity hitting drills in the gym, I realized movement directly stimulates mental and social dimensions regardless of cardiovascular intensity.² Prior to this, I believed only high-intensity sports improved health, but golf demonstrated that controlled, precise movement outdoors at Whitford can offer equal or greater benefits for mental clarity and social bonding.³ Consequently, I now view movement choices through a multidimensional lens rather than relying purely on physical metrics.⁴

4. Impact on future movement experiences:

Moving forward, I will prioritise movement activities after school that incorporate social and family connections rather than choosing solo fitness routines.¹ For example, instead of exercising alone, I plan to visit driving ranges like Whitford or participate in recreational golf and outdoor group sports with family members starting next term.² If injury or busy schedule prevents full physical participation, staying involved in practice sessions and outings will preserve my social and mental well-being.³ This decision ensures that my long-term commitment to movement builds sustainable hauora that endures through life changes as I get older and progress through school.⁴

a) A reflection for each of your THREE separate personal movement experiences of your chosen physical discipline or sport. Each reflection should focus on a different aspect of Fonofale. • Identify your personal movement experience and the date on which you completed this (for example, mountain biking on 3 March, 2026). • How did the personal movement experience make you feel and influence your hauora? • Identify which elements in the Fonofale model of health this connected to (for example, the physical pou, Tino faaletino, which relates to your body, health, and physical needs). • Give a specific example of your own participation in the movement experience to show how and why this element was influenced. The influence could be positive or negative. Note: Do not repeat material in your three reflections.

b) Complete one final reflection where you draw overall conclusions, making connections to at least FOUR elements of Fonofale. • What have you learnt about how movement influences your hauora? • How might this impact your future movement experiences?
