

L3GGP

Learning Leaders: Standard 3.1-Physical Activity Experiences

Mr Cowie
Miss Whiteman
Mr Strid

Do Now:

Briefly write down what physical activities you may have done in the past all the up until now.

Discuss why you may have participated in these activities and why?

When reflecting on your participation in this, did it have a positive or negative impact on you?

Learning Objective

- To comprehensively understand the L3GGP course purpose
- To build connection amongst our team
 - To gain an understanding of assessment 3.1

Our Goal:

Standard 3.1 -

Evaluate physical activity experiences to devise strategies for lifelong well-being.

Course Outline -

<https://docs.google.com/document/d/1TAbEx5fmUXODiW1JQ9F7Bg4xwle41VrCSVpaoe1nSGk/edit>

Assessment 3.1

Physical activity experiences are those experiences from your life to date. These may include: childhood play, games and pastimes, sport, fitness, recreation, outdoor pursuits, aquatics, dance, kapa haka, cultural festival performances, and will be explored in Part A.

Lifelong well-being refers to life beyond school, future well-being needs, and the role and place of physical activity within these. This will be explored in Part B.

Assessment:

https://docs.google.com/document/d/1H5cdGy7BpJu1xe0BZraHLAHSusL6zOo_PFSCzx6KALE/edit

Exemplar:

https://www.nzqa.govt.nz/assets/qualifications-and-standards/qualifications/ncqa-subject-resources/PF/01400/01400_FYP_student4_001.pdf

Task

I want you to timeline when you did these physical activities that you have brainstormed in your life. It could look like this:

0-3	
3-6	
6-10	
10-14	
14-18/now	

Indoor/Outdoor Connection Activities

L3GGP

Standard 3.1-
Physical Activity
Experiences

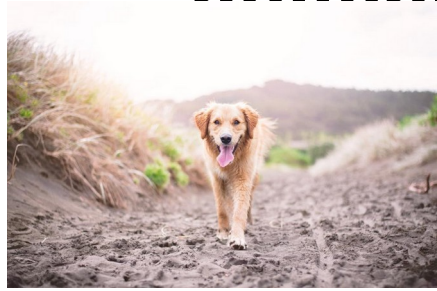

**3.1 -
Lesson 2:**

Do now: Practical 45 Minutes 0yr-3yr old activities

Reflection

**“ If I was an animal / creature
in today's activities what
animal would I have been?
Why?”**

L3GGP

Standard 3.1-
Physical Activity
Experiences

**3.1 -
Lesson 3:**

Do Now: Fallout Shelter

10:00

<http://rhs.rcschools.net/ourpages/auto/2017/5/9/53947996/Bomb-Shelter%20Who%20stays%20and%20who%20goes.pdf>

Learning Objective

- To begin writing our assessment and to learn about physical activities for ages 5-8 years old
- To build connection amongst our team

Do now: Practical 45 Minutes (List games 5-8yrs)

Reflection:

L3GGP

Standard 3.1-
Physical Activity
Experiences

**3.1 -
Lesson 4:**

Do now: Complete the physical activity ages worksheet

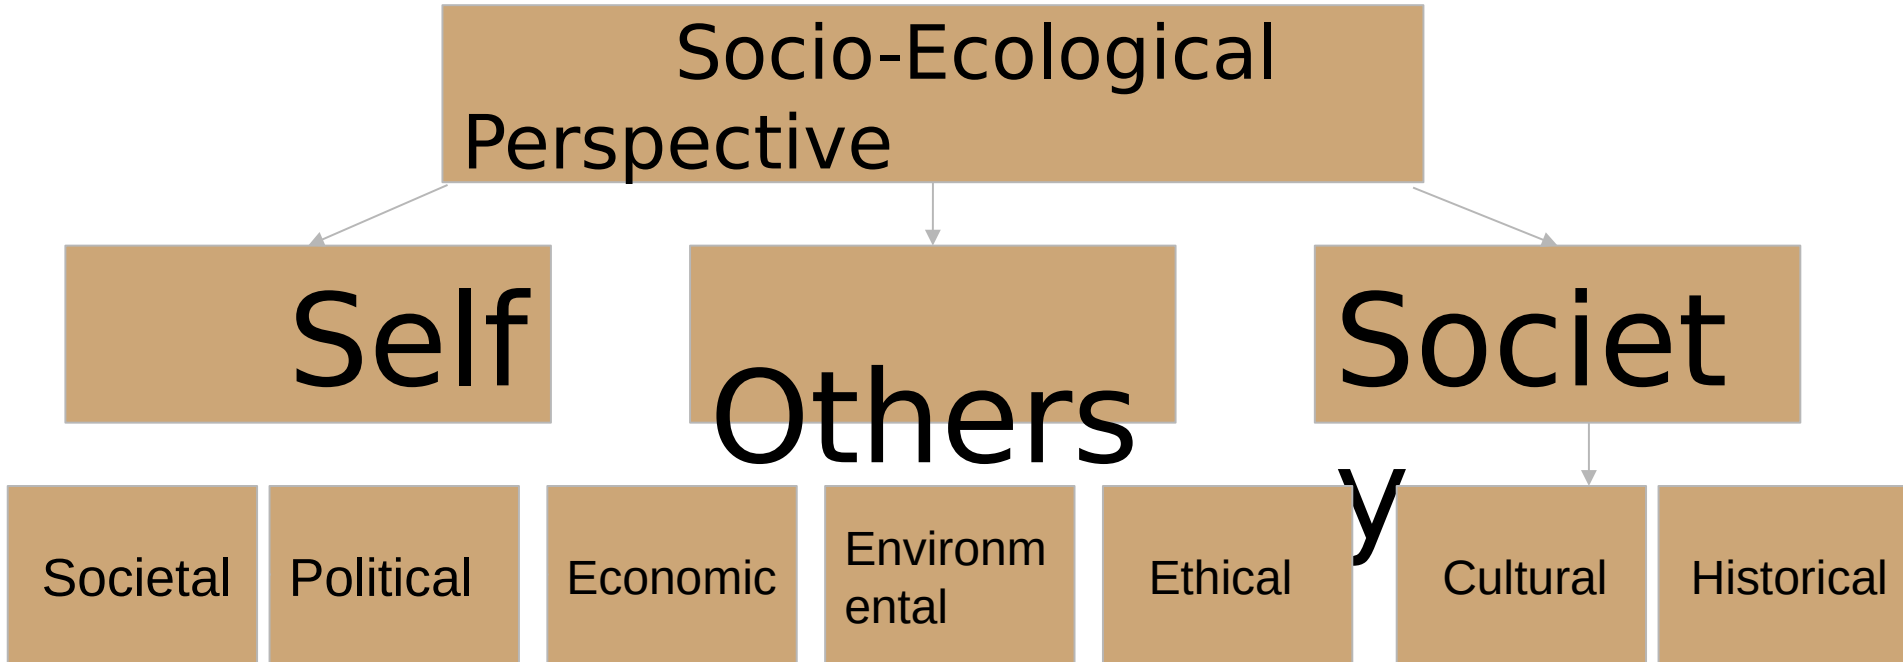

Task 1: Assessment 3.1 Guiding Document

- Complete the following document, we will use this to drive our assessment throughout the term

https://docs.google.com/document/d/1JGb5yUULoAX9Hq4xxfbn9G6KXguUZ8VRZqN_jy9tJKE/edit

Overarching view on Self, Others & Society

Self - Impacts on physical activity

- my well-being
- fun and enjoyment
- the challenge
- a sense of achievement
- aesthetic appeal
- that the activity pushes me to my physical and/or mental limits

Others - Impacts on physical activity

- Peers
- Family
- Accessibility
- School
- Socio-Economic Status
- Popular view
- Assumptions & Stereotypes

Societal Impacts - Socio-Ecological Perspective

Societal (Society) perspective

This could be (not limited to) an organisation, club, iwi, region, nation, law or policy that exists in the **environment** in which the Personal and Interpersonal people live. They will exist regardless of the immediate need or want, but have some impact on the life of the people who live within that **society**.

SPEEECH Factors

Task:
Mix and Match the
following

S	Societal factors Accepted norms, practices and behaviour in the community. Includes the influence of institutions such as the media and government
P	Political factors Rules, regulations and policies made by local, regional, and national authorities, and the enforcement of these decisions
E	Economic factors Commercial forces. State of the economy, including employment opportunities and cost of living - all affect people's access to finance
E	Environment factors Physical geography and surroundings, including lifestyle, location, and access to resources
E	Ethical factors A set of moral principles that define “right” and “wrong” behaviour, such as issues relating to liability, confidentiality, equity
C	Cultural factors Customs, practices, language, values, expectations, and world views specific to a particular social group
H	Historical factors Past background and reputation, customs and traditions, which can become closely tied with cultural values and social norms

Identifying SPEEECH Factors

- Watch the following video, write as many examples of SPEEECH factors as you can.

<https://www.youtube.com/watch?v=0bXJGZgR1BU&t=197s>

L3GGP

Standard 3.1-
Physical Activity
Experiences

**3.1 -
Lesson 5:**

Do No: Practical (45 Minutes)

Learning Objective

- To gain an understanding of the political speech factor
- To gain awareness of games for 5-10 year olds

Societal Task

Your task is to look at the article below and answer the following questions about how this impacts on **Societal** Factors:

[Russian anti-doping agency](#)

Societal Factors

Considering the three bullet points below, choose **ONE** and explain how this article has a positive/negative affect on that area?

- Social norms - what people consider to be the 'right' way of living.
- Practices and behaviours within communities - how different groups of people act depending on their circumstance, attitudes and values.
- Media (Tv, print, social media, radio) - the way in which this huge part of everyday life can influence our behaviour.

Who is disadvantaged by this issue? And why?

Who benefits from this issue, and why?

Political Factors

Political factors are rules, regulations and policies made by local, regional, and national authorities, and the enforcement of these decisions

Who is in power affects living in several ways – type of governing (oppressed versus democratic)

- Funding for social welfare.
- Funding for health and education.
- Laws and policies created by a governing body or sole entity.
- Any involvement in war.
- Ways in which a nation deals with a crisis

Political Authorities - Women's Football World Cup 2023

**NEW ZEALAND
FOOTBALL**

For the Good of the Game

New Zealand Government

Te Kāwanatanga o Aotearoa

Political Task

Your task is to look at the article below and answer the following questions about how this impacts Political Factors:

[Winter Olympics - Russian Doping Scandal](#)

Political Factors

Using the article, answer the following questions about political factors. Remember politics involves:

- rules, regulations and policies made by local, regional, and national authorities, and the enforcement of these decisions.
- Who is in power affects living in several ways – type of governing (oppressed versus democratic)

What political decisions were made regarding this scandal?

Who did these decisions affect, and in what way?

L3GGP

Standard 3.1-
Physical Activity
Experiences

**3.1 -
Lesson 6:**

Do Now: Speed stacking

Task: Plus, Minus, Impact

Listen to the radio excerpt.

PLUS - What are some positives that are highlighted in the report?

MINUS - What are some of the negatives highlighted in the article?

IMPACT - Impact on Society -
How does some of the issues highlighted impact society.

Learning Objective

- To gain an understanding of the Economic, Environmental & Ethical SPEEECH Factors

Economic Factors

Economic factors are dictated by:

- Commercial forces and corporations
- The state of the economy, including employment opportunities and cost of living
- The global economy, financial markets and trade such as import and export.

All of these factors can have either a positive or negative effect on individuals financial circumstance.

Environmental Factors

Environmental factors come from our physical geography and surroundings, including lifestyle, location, and access to resources.

Resources include:

- Access to sport and leisure venues
- Access to clean air and water
- Public transport and public areas of service (libraries, citizens advice)

Ethical Factors

Ethical factors are a set of moral principles that define “right” and “wrong” behaviour, such as issues relating to liability, confidentiality, equity.

Ethical factors that exist in a sport specific context:

- Gamesmanship vs Sportsmanship
- Fairness, Integrity and Respect for their code of conduct a sporting field
- Healthy competition being based on a community of trusting and respecting athletes, coaches, organisations

Activity - Significant Sports Event

Choose any significant sporting event within the world.

On a document, write down three environmental, economical and ethical impacts your event faces/has faced.

Add at least one article link per SPEECH Factor.

Exit Task

List of games for 13-18 year olds, write on whiteboard

Full Practical - 24/02/22

Bring PE gear for the next two lessons

L3GGP

Standard 3.1-
Physical Activity
Experiences

**3.1 -
Lesson 7:**

Do Now: 45 Minute Practical

Learning Objective

- To gain an understanding of the Economic, Cultural and Historical SPEECH Factors
- To explore barriers/enablers which impact your participation in physical activity

Recap: *SPEECH* Factors

	Definition	Example
S	Social: Socially accepted attitudes and practices, global spread of ideas	<i>Physical activity and sport can create a sense of belonging and being part of a group' this can motivate individuals to continue participation. Individuals who are not connected with a group will lack this sense of belonging and may be at risk of dropping out</i>
P	Political: Government rules, regulations and policies - or lack thereof	<i>Depending on the structure of a school timetable, learners may have increased access to quality physical education lessons; this may help them develop more positive attitudes towards physical activity compared with those learners who have limited quality physical education lessons.</i>
E	Enviro: Includes a person's lifestyle and immediate surroundings	<i>People's participation in physical activity may be limited due to the cost involved, location and range of services available.</i>

SPEECH Factors Cont.

E	Eco: The role finance and commercial forces play in relation to physical activity	<i>A community may not be able to afford a high standard of recreation facilities, which in turn may discourage people from being active.</i>
E	Ethical: Includes a person's morals and values and what their view of what is right	<i>An individual's values related to physical activity and their understanding of what is right and wrong will influence their commitment towards being involved in physical activity and underpin decisions they make.</i>
C	Cultural: Customs, practices and expectations specific to a particular group	<i>Fitness culture often promotes sexually appealing figures to market products and services. This may be appealing to some who want to achieve such a look, but may discourage others because they feel alienated and not be able to achieve such a look.</i>
H	Historical: The way attitudes and practices change over time.	<i>Increased acceptance and exposure of female sport though netball, women's cricket and women's rugby, gaining increased media attention.</i>

Task

Identify and find what is a barrier? Then find out what is an enabler?

Thinking about this, what is a barrier for you participating in physical activity right now?

Enablers/Barriers

ENABLERS

- You have freedom to choose which sport you want to do
- Committed to play for a sports team/club
- Physical activity gives you time with your friends and a break from work/uni

BARRIERS

- Your opportunities at school will drop off
- You may have to undertake memberships which are very costly
- Provide own equipment
- Provide own transport to facilities
- Less time because of other

Strategies to overcome Barriers

Once you've established all of those things - then look at **what strategies you can put in place which will help you overcome the barriers and allow you to continue that lifelong participation.**

Strategies can be as simple as:

- getting a buddy to train with and making a scheduled time every week to meet up and do some form of physical activity
- Join a sports club, team, or gym etc

Activity - SPEEEECH Factor Review

Read over the following document and complete.

<https://docs.google.com/document/d/1WfP9Nwli8tv89quAGUU9PDFf8y3FwOYCfkBb9P0Sphk/edit>

This can be transferred

L3GGP

Standard 3.1-
Physical Activity
Experiences

**3.1 -
Lesson 8:**

Do Now:

Write down two
SPEECH factors
which significantly
impacted a particular
time in your sporting
life.

List specifically how it
affected you

Learning Objectives

- To develop understanding of assumptions and stereotypes within a sporting context

Assumptions/Stereotypes

- Girls can't compete with boys
- Certain sports are for certain genders e.g. Netball for women, rugby for men
- Sportsmen are paid more than sportswomen
- Women can be better at sports like gymnastics – flexibility
- Women in sport are judged on their attractiveness not just their ability

Assumptions/Stereotypes

- Only Indians play cricket
- Polynesians are good at rugby
- All black people can run fast
- White people have played golf or tennis once in their life at least
- Old people are more experienced
- Tall people play basketball/netball
- Women play netball not men
- Men play rugby, not women

Closing Task

Identify at least 2 assumptions that have been made about you
Did you challenge that assumption or did it affect you in a negative way?

For example, people believe that I can't play basketball because I'm short and I challenge that assumption by still playing successfully and enjoying the sport.

It gave me more reason to prove myself sometimes.

Physical Activity
Experiences

3.1
Lesson
11:

Learning Objective

- To recap our entire learning so far

Assessment writing guide:

L3GGP

Standard 3.1-
Physical Activity
Experiences

3.1
Lesson
12:

For Achieved *(when checking back on your work)*

What you are required to do	What you need
Evaluate physical activity experiences to devise strategies for lifelong well-being involves: ● examining personal physical activity experiences to date ● considering the influences on and reasons for participation in physical activity experiences ● making judgements about the relationship between the experiences; and the potential impact of the experiences on lifelong well-being ● using the judgements as a basis for devising strategies for lifelong well-	You can 'chunk' physical activity into brackets to reflect on your life (0-3yo, 4-10yo, 11-18yo, life after college) Make connections to Health & Physical Education underlying concepts: ● Connection with Hauora ○ Interrelationships of dimensions ● Connection with Health Promotion ○ Physical activity services and facilities in the community ○ Policies and procedures regarding physical activity in school environments ● Connection with Socio-Ecological Perspective ○ <u>Influences on physical activity</u> promoted through local/national/global factors (relevant, not all factors) ○ Environmental barriers and enablers towards physical activity ● Connection with Attitudes and Values ○ How physical activity can affect character

Then...for Merit

Evaluate, in depth, physical activity experiences to devise strategies for lifelong wellbeing involves:

- comprehensively examining personal physical activity experiences to date with:
 - **Personal:** Ability and experience, resources, lifestyle, attitudes and values, health and medical, demographics
 - **Interpersonal:** Family, friends, classmates/workmates, teachers/coaches, relatives
 - **Societal:** Influence of media, laws, role models, groups ([SPEECH factors](#))
- making coherent judgements about the **relationship between the experiences**; and the potential **impact** of the experiences on **lifelong well-being**.
 - Judgements are your formed opinions from your life's reflection. What facts/details of your physical activity experiences will impact your lifelong well-being. Coherent means you are able to make sense of your information (see I AC model)

Aiming for Excellence

Critically evaluate physical activity experiences to devise strategies for lifelong wellbeing involves:

- questioning and challenging **assumptions** about the relationship between the experiences; and the potential impact of the experiences on lifelong well-being
(Assumptions can be statements, ideas, common sayings, societal thoughts and beliefs)
- making coherent and insightful **judgements** that build on the questions and challenges:
 - Judgements are your formed opinions from your life's reflection. What facts/details of your physical activity experiences will impact your lifelong well-being. Coherent means you are able to make sense of your information (see LAC model). Insightful means using **current research** and/or theoretical knowledge to deepen understanding and perspectives are given.

Socio-Ecological Perspective

(SEP)

This is a framework to examine multiple effects and interconnections of social influences. SEP can be divided into three categories - personal, interpersonal and societal - each of which interconnect with, and affect, others.

As influences are interrelated, they can impact on each other, therefore, when examining a person's participation in a physical activity, the SEP's should all be considered.

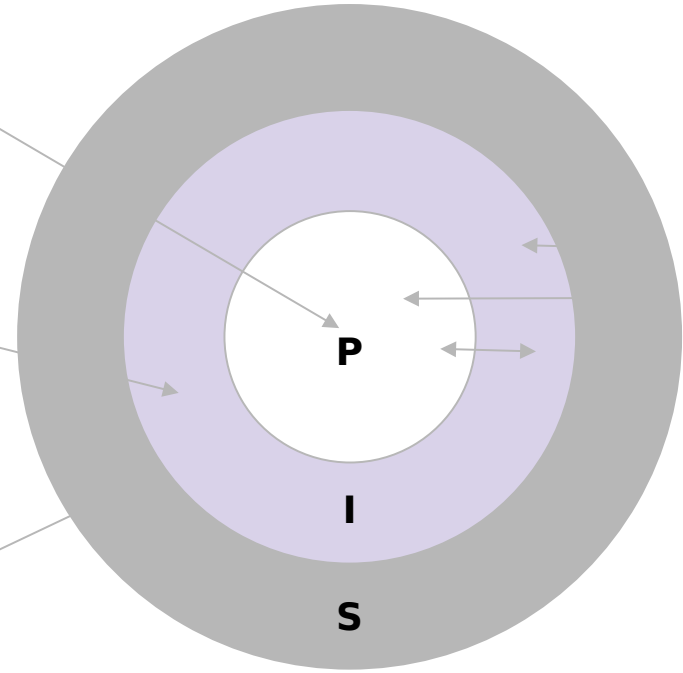

Applying a SEP when examining a physical activity allows us to explore how broader socio-cultural factors (SPEECH) influence the ways in which we view and understand our experiences.

Influences of Physical Activity

PERSONAL: Personal influences on a physical activity include the attitudes, values and behaviours of individuals. The concept of physical activity can vary greatly from person to person and may change, depending on the environment and life circumstances.

INTERPERSONAL: Participation on non-participation on physical activity is often influenced by significant others - such as friends, family and role models who have the power to influence a person's behaviour by who they are and what they do. Interpersonal influences can impact on choices, attitudes and behaviours a person adopts in relation to their physical activity.

SOCIETAL: Societal influences occur as the result of an individual's interaction with those around them - can involve social norms, government policies, financial wealth of the community, media messages, and environmental constraints. People's perspectives of physical activity and their decisions regarding participation are influenced by a wide range of societal factors. These factors make up **SPEECH**.

Checklist – Begin assessment part A, make sure to cover all of these bullet points

- What experiences take part at each stage and why ?
- Give examples of your experiences – positive and negative
- INFLUENCES - Personal, Interpersonal and Societal
- Advantages & Disadvantages - What were the advantages and disadvantages to your participation in sport?
- ASSUMPTIONS - Identify assumptions that exist and question and challenge these assumptions eg females/males only playing certain sports or given certain opportunities – Gender & Sexuality imbalances – expectations of male/females, masculinity vs femininity
- IMPACT ON HAUORA – POSITIVE AND NEGATIVE

How have these experiences impacted your wellbeing? Explain the interrelationship between the aspects of wellbeing. Explore the impact of the experiences on lifelong wellbeing.

- Infancy – baby. When I was a baby, my parents took me to swim classes between the age of 6 months – 5 years. This enabled me to enjoy swimming, and be able to float. The positive influence of being brought up in NZ; the culture and environment of living in NZ means that we have access to swimming pools and beaches easily, so swimming is important and my parents wanted to make sure I had the ability to swim, especially for safety. My father is also passionate about swimming and trains 2-3 times a week, and wanted to share his passion of swimming with me as a child. I learnt to swim at a young age, so it became something I enjoy and allowed me to explore swimming and being around water all my life – snorkelling, surfing, diving, boating, windsurfing. My parents were able to afford to pay for swimming lessons, but this may be a barrier for other families.
- A negative experience I had to do with swimming was when I did club swimming, I would sometimes lack motivation as I was made to do training 2-3 times a week, and didn't always want to get into the pool.

Closing task: Assessment Planning

Physical Activity Past and Present (Copy this table to a Google Doc notes and complete)

Life Phase	Significant physical activities	Influence(s), contributing factors (SEP)	Assumptions that relate to your own physical activity experiences	Impact on Hauora (positive or negative)
0-3				
4-10				
11-17				
Present				
18+ (anticipate after high school)				

How do we use stats in our writing?

● Reference

Education Central states “This, along with factors such as perceived time and money constraints for students, contributes to a widely acknowledged ‘drop off’ in student participation in sport at a tertiary-level.” As I am going to be studying in tertiary education, and I won’t have as much support as I did in school with transport and gear for my rugby games, I might struggle to afford to play and pay for club rugby. I can overcome this barrier by getting a part time job when I’m not studying, as well as doing online workouts for free, to improve my fitness.

STATS TO SUPPORT – After high school physical activity rates drop off...

- “This, along with factors such as perceived time and money constraints for students, contributes to a widely acknowledged ‘drop off’ in student participation in sport at a tertiary-level.”

<https://educationcentral.co.nz/combating-the-drop-off-in-student-sport-after-secondary-school/>

- Teenagers are recommended to be physically active up to an hour per day

<https://www.health.govt.nz/your-health/healthy-living/food-activity-and-sleep/physical-activity/being-active-everyone-every-age/helping-teenagers-be-more-active>

Add some statistics

- **Strategy 1- I will continue to play basketball with the team we had at school, those who have not moved away, so we can keep in contact and be competitive.** (Get some statistics to support it. For example→) *The 'Stay in place' study by SportNZ reveals that a lot of young people discontinue sports once they leave school and I think this is a real shame. I can understand that it becomes more of a hassle to organise when you don't have a sports coordinator and organised school competitions, but I contacted our local basketball team and they seem really organised and keen to enter some new teams in the open league. This will be a big step for us but I think it is really good for my taha hinengaro to keep challenging myself mentally and physically.*
