

L3GGP - 3.7

Standard 3.7 AS91504

Risk Management

Do Now:

<https://drive.google.com/file/d/1AJreup5yigAdL6ZxeUgxyoBY7-bD7X8Z/view?ts=602ebd83>

Learning Intentions / Success Criteria:

By the end of the unit I will:

- Understand what I need to do to gain an achieve, merit or excellence grade in the risk management assessment.
- Understand what is meant by the term risk management
- Be able to identify a range of risks or causal factors and ways of minimising the associated risk.

Types of Risks

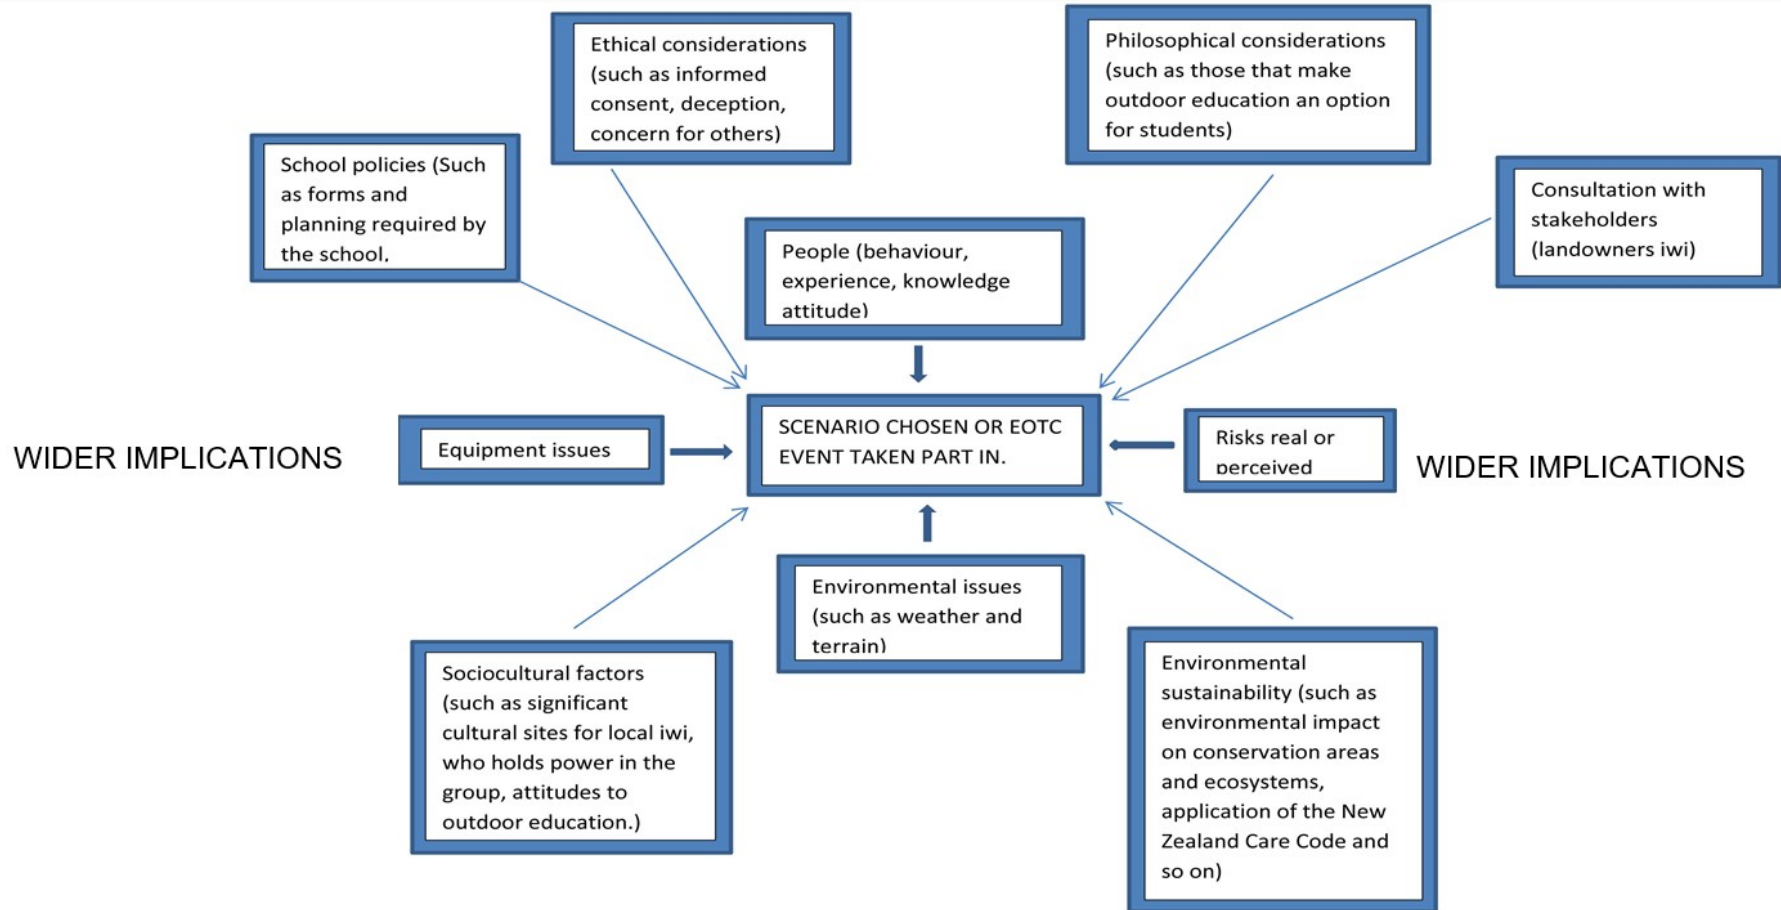

- **Perceived Risk:** individuals perceptions of how much risk exists within that activity.
https://www.youtube.com/watch?v=H5p_gu_WKE0
- **Absolute Risk:** This is the risk that exists before you begin to manage the risk or make it safer
- **Actual or Real Risk:** This is the risk that exists at the time of doing the activity. This is the risk that remains after you have applied risk management strategies to make the activity safer.

Task 1:

Identify and write down all the risks you see could be involved within your trip

Risk Management

Developing an understanding

	A	M	E
The student analyses issues in safety management for outdoor activity to devise safety management strategies. They have done this by: examining issues in safety management inherent in the proposed scenario, considered factors that influence the issues, and devised safety management strategies to address the identified issues.			

General housekeeping:

- Camp attendance requirements
 - 70% Attendance
 - Honest completion of all prior assessments
 - Completion of part 1 of 3.7 assessment
- Catch up and Get ahead, sign up. Thursday.
