Learner Instructions

You are going to use the Relationships and Sexuality health-related situation that has been created by your kaiako, to demonstrate your understanding of decision-making. The situation will contain a dilemma or an issue where a decision needs to be made.

You need to carefully consider a range of aspects within the health-related situation, and use decision-making skills to think critically about the decision you believe should be made, in relation to hauora. You can use a relevant decision-making process as a tool to help you work through the situation.

Achievement Criteria

Achievement	Achievement with Merit	Achievement with Excellence
Demonstrate understanding of decision-making in a health-related situation	Explain decision-making in a health-related situation	Evaluate decision-making in a health-related situation

Assessment Task

In your response you will:

- Describe the factors that you believe are relevant to the health-related situation, and the possible consequences that these factors present.
- Describe the decision you believe should be made in the situation, with reference to the factors and anticipated consequences of the decision.
- Discuss why the factors and anticipated consequences of your proposed decision are significant.
- Explain how these factors and anticipated consequences interrelate to influence the decision.
- Evaluate the extent to which the decision-making will affect hauora by looking broadly at the situation. You might think about short-term, long-term, personal, interpersonal, and/or societal impacts.

Present Your Learning

A written response to the prompts (750-800 words). To be completed during class time only.

If you would like to present your work in a different way to the above options, negotiate and co-construct this with your kaiako.

Timeframe

Collating your responses with supporting evidence should take around 6-8 hours. Class time will be allocated for you to engage in this Assessment Activity. Your kaiako will provide you with details on submission deadlines and may also provide you with checkpoints to help you stay on track.

Getting Started

With your kaiako, you will create a scenario based on a health-related situation to do with the Key Area for Learning: Relationships and Sexuality. Make sure that within the situation, there is a decision that needs to be made.

Wānanga with peers, family and/or your kaiako to stimulate your thinking around the situation and to help you gain further insights.

Revisit the decision-making process models you have engaged with as part of the teaching and learning programme so far this year. Decide which one would be the most suitable to help you with your decision-making for this Assessment Activity. You will then use this scenario to respond to the prompts in the Assessment Activity.

Scenario

Ariana is 16 and recently started dating Tai, who is 17. Tai is outgoing and known for being fun and popular. He often gets invited to parties and knows a lot of people around their area. Ariana is more introverted and focused on her studies but feels flattered that Tai is interested in her. Being with him gives her a sense of belonging she hasn't felt before.

One Friday night, Tai invites her to a small gathering with his older friends. Ariana is nervous but agrees to go. When they arrive, people are drinking alcohol and vaping. Tai hands Ariana a drink and says, "Don't be boring — everyone's chill here." Ariana hesitates. She doesn't usually drink and promised her mum she wouldn't, but she doesn't want to embarrass Tai or seem like a child in front of his friends.

Later in the night, Tai jokingly calls her "uptight" for still not drinking and says it's "just one night." Ariana starts to question whether saying no will make her seem difficult — or if saying yes will make her lose control of her values. She feels stuck and unsure what to do next.

Learner Assessment

Task 1: Describe the choices Ariana has in this scenario.
Choice 1:
Choice 2:
Choice 3:

Task 2. Describe the factors (PERSONAL, INTERPERSONAL, SOCIETAL) influencing each of Ariana's choices stated in task 1.
Personal factors influencing choice 1:

Interpersonal factors influencing **choice 1:**

Societal factors influencing **choice 1:**

Personal factors influencing **choice 2:**

Interpersonal factors influencing **choice 2:**

Societal factors influencing **choice 2:**

Personal factors influencing **choice 3:**

Interpersonal factors influencing choice 3 :
Societal factors influencing choice 3 :

Task 3. Describe each of Ariana’s possible consequences and outcomes for each of her choices. <i>Use hauora and the model of health te whare tapa whā to support your answers.</i>
Possible consequences on hauora of choice 1:
Possible consequences on hauora consequences of choice 2:
Possible consequences on hauora consequences of choice 3:

Task 4: Describe the best decision you believe should be made in the scenario and discuss the reasons WHY. *Use examples of influencing factors and possible consequences on hauora and the model of health te whare tapa whā to support your answer.*

Task 5: Explain HOW these influencing factors and possible consequences, (discussed in task 4) interrelate to collectively influence the decision (meaning how has one impacted the other). *Use hauora and the model of health te whare tapa whā to support your answers.*

Task 6: Evaluate the significance and potential long term impacts the decision you have selected will have on Ariana's hauora and the model of health te whare tapa whā .

Use examples as evidence to support your answers.

92009 Marking Criteria 2026

Achieved	Achieved with Merit	Achieved with Excellence
Demonstrate understanding of decision-making in a health-related situation	Explain decision-making in a health-related situation	Evaluate decision-making in a health-related situation
The Learner is able to: - Describe factors relevant to the decision-making and possible consequences of a health-related situation. - Describe a proposed decision in response to the health related situation, in relation to hauora, with reference to the factors and anticipated	The Learner is able to: - Discuss why the factors and anticipated consequences are significant to the proposed decision. - Explain how the factors and anticipated consequences interrelate to influence the proposed decision, in relation to	The Learner is able to: Draw conclusions about the significance of the decision making in response to the health-related situation, in relation to hauora.

consequences of the decision.	hauora.	
Overall level of achievement will be based on a holistic examination of the evidence provided against the criteria in the Achievement Standard.
